

# PORTAL

PORTAL is a uniquely designed training application that can integrate with your current management systems to provide a cost effective solution for your training needs.

PORTAL provides innovative IT based training developed from existing operating procedures by converting them into a simple to use interactive training tool.

Each PORTAL Module will contain key learning points and operational specific data from clients existing procedures, photos and graphics.

A wide range of multimedia files can be accessed from the "Toolbox". This could include associated learning documents, videos, images, drawings and dynamic data.

Self assessment exercises based around the key learning points of each PORTAL Module are aimed at evaluating the learning outcomes of PORTAL users.

PORTAL also offers "Technical Data Sheets" that provides users the opportunity to expand their knowledge on a range of systems, subjects and equipment as well as operational principals and philosophies.

For clients wishing to host PORTAL on their company networks we also offer an "editing tool" that allows simple updates to the textual content of each Module.

## TRAINING SOLUTIONS

If you're looking to reduce training budgets whilst retaining a high level of technical awareness of your employees PORTAL is the solution.

PORTAL offers a simple yet cost effective alternative to the provision of often expensive face to face training courses. There will be no more need to have employees travel long distances to be trained.

## SAVINGS

Client budget constraints were given highest priority by the design team when developing PORTAL.

Due to PORTAL's unique design, clients can dictate the content and complexity of each PORTAL Module. This "building block" approach allows clients to design the application to their own specification and budgets.

## FLEXIBILITY

PORTAL can be developed in both HTML and DVD formats. For clients wishing to host PORTAL on their company networks we can offer the following functionalities:

- Security Gateways
- Administrative Tools
- User Tracking
- Reporting Capabilities
- Automated Certification
- Certificate Validity Email Reminders

PORTAL's ingeniously designed logo offers clients a unique branding opportunity to incorporate their company colours. This in turn promotes ownership of this bespoke training tool.

PORTAL can also host most types of multimedia applications making it the perfect location for all your training course material.

If you would like to arrange for a detailed demonstration of PORTAL please contact us
